

DOCUMENT AUDIT REPORT

Model: ./test/Retail_Risk_v2.docx
Template: ./test/MDD_Master_v2026.docx

Audit ID:	AUDIT-20260730
Report Generated:	2026-07-30 20:31:00
Analysis Basis:	WordprocessingML Structure, Headings & Numbering Resolution

1. EXECUTIVE SUMMARY

Overall Audit Status: ■■ **ATTENTION REQUIRED**

The audit detected 4 structural or integrity issues requiring remediation. Please review Section 2 and Section 3 for specific details.

2. INTERNAL INTEGRITY (TOC SYNCHRONIZATION)

■ **1 Discrepancy(ies) Detected: TOC is out of sync with body content.**

#	Issue Type	Location (TOC)	Technical Details
1	TOC and Body Heading Mismatch	Entry 3	TOC lists '3. Methodology' but body is '3. Model Methodology'

3. TEMPLATE COMPLIANCE & STRUCTURE

A. Compliant Standard Sections

■ The following sections exist, are correctly numbered, and follow standard mandates:

Model Methodology

B. Structural & Compliance Gaps

■ 3 Non-Compliance Issues Detected: Action is required to meet corporate standards.

Category	Section Text	Discrepancy Description
Missing Mandatory	variable selection	Section required by template but omitted.
Incorrect Hierarchy	model methodology	Expected numbering '3', but found '1.1' in model.
Extra Section	development testing & performance	Section is not defined in standard template.

Audit Notes & Disclaimers

This automated document audit is based on parsing Microsoft WordprocessingML (XML) structures and interpreting user-defined styles (Heading 1-9) and numbering instances. While highly reliable for detecting structural and hierarchy mismatches, this audit does not assess the *semantic content* or accuracy of the text within those sections. Deviations may result from improper use of styles in the source document or custom manual numbering overrides that bypass standard Word definitions. This report is part of the model governance process and should be reviewed alongside human validation.
